Our Approach to **ESG & Sustainability**

Anitech takes a holistic and strategic approach to ESG and sustainability. We believe that a successful ESG strategy is not a standalone initiative but a fundamental part of core business operations. Our approach is built on a cycle of continuous improvement, ensuring your organisation remains agile and ahead of the curve.

Our methodology includes:

1 Discover & Diagnose

We begin by understanding your unique operational landscape, identifying key risks, opportunities, and material issues through comprehensive assessments.

2 Strategise & Plan

We collaborate with your team to develop a tailored Sustainability and ESG Strategies and roadmap that aligns with your business goals, regulatory requirements, and stakeholder expectations.

3 Implement & Integrate

We support the seamless integration of Sustainability and ESG Strategies practices across your value chain, from policy development and system implementation (like ISO 14001) to employee training and engagement.

4 Report & Optimise

We provide expertise in mandatory and voluntary reporting (ASRS, GRI, IFRS) and help you use data-driven insights to monitor performance, communicate your progress, and continuously optimise your strategy.

Our Capabilities in ESG & Sustainability

We offer a comprehensive suite of services to help your organisation meet its ESG and sustainability goals:

Strategy & Governance

- ESG & Sustainability Strategy Development
- Board & Management Advisory
- Stakeholder Engagement & Materiality Assessments
- Policy & Governance Framework Development

Reporting & Disclosure

- Mandatory Climate-Related Disclosures (ASRS)
- Global Reporting Standards (GRI TCFD)
- Carbon Accounting & Reporting
- Compliance & Legal Alignment

Climate & Decarbonisation

- Climate-Related Risk & Opportunity Assessments (TCFD aligned)
- Carbon Footprint Analysis (Scope 1, 2, & 3)
- Decarbonisation & Net-Zero Pathway Development
- Energy Audits & Optimisation Strategies

Environmental Management

- Environmental Management Systems (ISO 14001)
- Circular Economy (ISO 59000) & Waste Reduction Strategies
- Life Cycle Assessments (LCA)
- Supply Chain Sustainability & De-risking

Stages of Engagement/milestones

Our typical engagement follows a structured approach designed to deliver maximum value and sustainable outcomes:

Phase 1

Assessment & Scoping (2-4 weeks)

- Stakeholder consultation
- Materiality assessment
- Baseline ESG performance review
- Regulatory and certification mapping

Phase 2

Strategy & Roadmap Development (4-9 weeks)

- ESG strategy development
- Prioritisation of initiatives
- Roadmap with timelines & KPIs
- Risk and opportunity analysis

Phase 3

Implementation & Support (3-6 months)

- Policy and process integration
- Staff training and capacity building
- Tool and system implementation
- Ongoing advisory support

Phase 4

Reporting & Continuous Improvement (Ongoing)

- ESG performance monitoring
- Reporting (e.g., GRI, TCFD, CDP)
- Stakeholder feedback loops
- Continuous improvement planning

We believe sustainability is not a compliance requirement but a pathway to long-term trust, resilience, and shared prosperity
